DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11, drawn to a retractable coiled toy, classified in class 446, subclass 486.
- II. Claims 12-21, drawn to a method for using a retractable coiled toy, classified in class 434, subclass 393.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In this case the product as claimed can be used in a materially different process of using the product, for instance, the coiled toy does not have to be twirled by the handled so the coiled section expands outwardly.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Jonathan Grant on 10/17/01 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 3712

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bena Miller whose telephone number is 703.305.0643. The examiner can normally be reached on Monday-Friday.
